Data Flow Task: DF_PlayerStats

```
graph LR; ExcelSource[Excel Source] --> DataConversion[Data Conversion]; DataConversion --> Sort[Sort]; Sort --> ODBCDestination[ODBC Destination];
```

The diagram illustrates a Data Flow Task (DFT) named 'DF_PlayerStats'. It consists of four tasks connected sequentially: 'Excel Source' (with an Excel icon), 'Data Conversion' (with a conversion icon), 'Sort' (with a sort icon), and 'ODBC Destination' (with an ODBC icon). Each task has a green checkmark in its top right corner, indicating it is configured correctly. The tasks are connected by arrows showing the flow of data from 'Excel Source' to 'Data Conversion', then to 'Sort', and finally to 'ODBC Destination'. The interface also shows a 'Data Flow Task' pane on the left with 'DF_PlayerStats' selected, and a 'Solution Explorer' pane on the right showing 'Get Changes'.
